Backed	Laravel, NodeJS, REST API
Others	AI, Linux, Docker, CI/CD, Git

Experience

Fluent Conveyors
Full time, Denver, Colorado, Remote

FRONTEND ENGINEER — *April 2023 - Present*

- Optimized two core projects, significantly improving site performance and user experience, which contributed to increased profitability.
- Enhanced site speed, reducing load times to improve Core Web Vitals, directly impacting SEO rankings and user retention.
- Designed and implemented a fully functional, professional-grade e-commerce application, delivering a seamless shopping experience with advanced features and optimized performance.
- Played a key role in driving increased customer orders through efficient and scalable application development.
- Played a pivotal role in implementing SEO strategies, resulting in the website achieving the 1 ranking on Google for targeted keywords.
- Collaborated with cross-functional teams to integrate frontend solutions with backend systems seamlessly.
- Leveraging AI to accelerate development and enhance quality

Anveen Private Ltd.
Full time, Hyderabad, India - Hybrid

FULL STACK SOFTWARE ENGINEER — *October 2021 - March 2023*

- Designed and implemented scalable RESTful APIs using the Laravel framework.
- Developed fully functional, responsive Vue.js components to enhance user experience and ensure seamless web performance.
- Implemented a microservice architecture within a WordPress codebase to handle API requests efficiently, significantly improving the application's scalability and performance.
- Led the implementation of a Single-Page Application (SPA) experience within WordPress using VueJS.
- Gained experience in leading a small team and following Scrum/Agile principles for iterative software development.
- Executed unit tests and end-to-end tests for both frontend and backend codebases to ensure robust and reliable solutions.

Developer Experience Hub
Contract Based, Dhaka, Bangladesh
